Notes to the Interim Consolidated Financial Statements (Unaudited)

March 31, 2009

1. Nature of Operations

The Company is in the business of owning, acquiring, exploiting, exploring, developing and evaluating mineral properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. The Company has interests in the properties all located in the State of Nevada, USA.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles on a going concern basis, which presume the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. As at March 31, 2009, the Company had a working capital deficit of \$80,758 (December 31, 2008 - \$575,562). The Company's ability to continue as a going concern is dependent upon achieving profitable operations and upon obtaining additional financing. While the Company is expending its best efforts in this regard, the outcome of these matters can not be predicted at this time. These financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business.

The recoverability of amounts shown as mineral properties and deferred exploration costs is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete their development, and future profitable production or disposition thereof. The Company is considering a number of alternatives to secure additional capital including additional funding facilities or equity raisings.

2. Significant Accounting Policies

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles on a basis consistent with those followed in the most recent audited financial statements. These unaudited interim consolidated financial statements do not include all the information and footnotes required by generally accepted accounting principles for annual financial statements. Therefore readers are advised to refer to the Company's annual audited financial statements for the year ended December 31, 2008 for additional information.

Accounting Polices to be Adopted

International Financial Reporting Standards

In January 2006, the CICA Accounting Standards Board (AcSB) adopted a strategic plan for the direction of accounting standards in Canada. As part of that plan, accounting standards in Canada for public companies are expected to converge with International Financial Reporting Standards ("IFRS") by the end of 2011. The impact of the transition to IFRS on the Company's financial statements has not yet been determined.

7. Mineral Property and Related Deferred Exploration Expenses**a) Fire Creek Gold Properties, Lander County, Nevada, U.S.A.**

The Company has a 100% ownership interest in this land block which has been expanded to a total of 484 claims, or 9,680 acres, and fee lands of 1,428 acres. In 1988, the Company entered into an agreement with two joint venturers to explore and develop the gold property. Under the terms of the agreement, Klondex received an advance minimum royalty of \$10,000 per month. The joint venturers terminated the agreement on March 31, 1999. As a result the Company has regained 100% ownership of the property and is not obligated to repay the advance royalty payments amounting to \$1,582,162 (US\$1,220,000). During fiscal 2002, the Company purchased the drill cores and data from the joint venturers for consideration of US\$4,000 and issuance of 15,000 common shares of the Company.

Klondex Mines Ltd.**Notes to the Interim Consolidated Financial Statements (Unaudited)**

March 31, 2009

7. Mineral Property and Related Deferred Exploration Expenses (continued)**b) Lander & Eureka Counties, Nevada**

During fiscal 2006, the Company entered into an option agreement to acquire a 100% interest (the "Option") in certain lands located in Lander & Eureka Counties, Nevada (the "Property"), from Fire Creek Lands, LLC (the "Optionor"). In consideration of the Option, the Company must make option payments in the aggregate amount of \$380,000 over a period of five years (US\$255,000 paid to date), and may purchase the Property on or before June 17, 2010 for \$2,500,000 with prior option payments being applied as a credit towards the purchase price.

In the event of the outright purchase of the Property by the Company, the Optionor will retain a 3% net smelter royalty, with the Company having a one-time option to purchase one percent of the royalty in consideration of \$1,000,000, at any time until June 17, 2015.

c) Maggie Creek, Elko County, Nevada

The Company has a 66.66% undivided interest in 48 claims (960 acres) situated in sections 8, 16 and 20 in the Maggie Creek area.

d) Hot Point Springs, Lander County, Nevada

The Company has a 100% ownership interest in 39 claims (780 acres) situated about 6 miles east of the town of Crescent Valley.

e) Reef claims, Churchill County, Nevada

The Company has a 100% ownership interest in 8 claims (160 acres) in the Fairchild District of Churchill County.

8. Asset Retirement Obligation

Included in the carrying value of the mineral properties is \$223,433 (US\$171,300) representing the estimated fair value of a liability for asset retirement obligations that arose as a result of drilling activities since fiscal 2004, on the Fire Creek properties. The fair value of the liability \$223,433 was determined to be equal to the estimated drill well site remediation costs as it is assumed that remediation would commence within six months of year end. As at December 31, 2008 the Company has not commenced development of any property and accordingly a reasonable estimate of the timing of the cash flows can not be made. As a result the expected cash costs have been recorded as a current liability.

In previous fiscal years, the Company has posted non-interest bearing bonds totalling \$223,433 (US\$177,300) with the Bureau of Land Management in the State of Nevada as security for these obligations. Fair value can not be reasonably determined and accordingly the bonds have been recorded at historical cost, adjusted for current exchange rates.

b) Capital risk management

The Company includes cash and equity, comprising of issued common shares, contributed surplus and deficit, in the definition of capital.

The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management but rather relies on the expertise of the Company's management and consultants to sustain future development of the business.

The Company's properties are in the exploration stage and as such the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise the additional funds required.

Management reviews its capital management approach on an ongoing basis and believes that this approach is reasonable given the relative size of the Company.

There were no changes in the Company's approach to capital management during the period ended March 31, 2009. The Company is not subject to externally imposed capital requirements.

1.6 Liquidity

The Company has no revenue generating projects at this time. The Company's historical capital needs have been met by equity subscriptions. As at March 31, 2009, the Company had a working capital deficit of \$80,758 (December 31, 2008 - \$563,415). The Company currently has insufficient working capital for general and administration expenses and will require additional funding. In addition, the Company will require capital to meet the exploration program for the Fire Creek property. However, this is a forward-looking statement as it involves known and unknown risks, uncertainties and other factors, which could affect the actual results, performance or achievements of the Company and impact on the adequacy of working capital required for the year 2009 expressed by such forward-looking statement. Also, the ability of the Company to continue with recommended exploration programs on its current properties, and/or to successfully acquire and develop additional properties in the resource sector is conditional on its ability to secure financing when required. The Company proposes to meet any additional financing requirements through the exercise of outstanding stock options and warrants, or arranging other equity financing, and/or finalizing a joint venture agreement with a partner(s) who will be able to assume the costs of recommended exploration programs. In light of the continually changing financial markets, there is no assurance that funding by equity subscriptions or finding a joint venture partner will be possible at the times required or desired by the Company.

1.6 Liquidity (continued)

Currency Risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

	US Dollars
Cash	\$ 59,434
Marketable securities	\$ 94
Reclamation bonds	\$ 177,300

At March 31, 2009 US dollar amounts were converted at a rate of \$1.2602 Canadian dollars to \$1.00 US dollar.

Capital risk management

The Company includes cash and equity, comprising of issued common shares, contributed surplus and deficit, in the definition of capital.

The Company's objectives when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management but rather relies on the expertise of the Company's management and consultants to sustain future development of the business.

The Company's properties are in the exploration state and as such the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise the additional funds required.

Management reviews its capital management approach on an ongoing basis and believes that this approach is reasonable given the relative size of the Company.

There were no changes in the Company's approach to capital management during the three months ended March 31, 2009. The Company is not subject to externally imposed capital requirements.

These estimates and assumptions form the basis for judgments about the carrying value of assets and liabilities and reported amounts for revenues and expenses. Different assumptions would result in different estimates and actual results may differ from results based on these estimates. These estimates and assumptions are also affected by management's application of accounting policies. Critical accounting estimates are those that affect the consolidated financial statements materially and involve a significant level of judgment by management. 1.15.2 Disclosure Controls and Procedures

The Company has disclosure controls and procedures in place to provide reasonable assurance that any information required to be disclosed by the Company under securities legislation is recorded, processed, summarized and reported within the applicable time periods and to ensure that required information is gathered and communicated to the Company's management so that decisions can be made about timely disclosure of that information. The Company's Chief Executive Officer and Chief Financial Officer evaluated the Company's disclosure controls and procedures for the three months ended March 31, 2009. The Board of Directors has adopted the recommendations made by management in the previous quarter and has implemented the procedures to ensure cohesive administration of financial and disclosure matters. Management and the Board have found those disclosure controls and procedures to be adequate for the above purposes.

1.15.2 Disclosure Controls and Procedures (continued)

Internal Controls over Financial Reporting

The Chief Executive Officer, the Chief Financial Officer and the Audit Committee of the Company are responsible for designing a system of internal controls over financial reporting, or causing them to be designed under their supervision, in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with Canadian generally accepted accounting principles. The Chief Executive Officer, the Chief Financial Officer and the Audit Committee have designed and implemented a system of internal controls over financial reporting which they believe is effective for the Company. During the review of the design of the Company's control system over financial reporting it was noted that due to the limited number of staff, there is an inherent weakness in the system of internal controls due to our inability to achieve appropriate segregation of duties. The limited number of staff may also result in identifying weaknesses with respect to accounting for complex and non-routine transactions due to a lack of technical resources, and a lack of controls governing our computer systems and applications within the Company. While management of the Company has put in place certain procedures to mitigate the risk of material misstatement in the Company's financial reporting, it is not possible to provide absolute assurance that this risk can be eliminated.
